

# BUSINESS AUTOMATION SUITE

## CASE STUDY

### Synopsis

#### Data Synchronization supporting cross platform applications

Today, manufacturing industry is undergoing major transformations in terms of using technology as critical part of their entire process. During the process, entire supply chain automation would be ideal and can keep all the stakeholders intact and on track. However, there are some unaddressed issues when dealing with their respective Distributor / Distributors network. In fact, the issues are from both the ends i.e. from Manufacturers to distributors and vice versa. Automation of transaction process alone never solve the problems. Majority problems are in data synchronization across all stakeholders.

### About The Client

The Client entered into Indian market almost a decade ago and through a rapidly expanding distribution network, has established itself as a leading international tyre maker in the country.

Today, they offer a range of tyres which feature the best of their innovative technology. The client's products are designed, produced and marketed to meet the challenges of mobility in the Indian market. The client's range of products in India caters to the rising demands of the Passenger Cars, **Truck & Bus and Two Wheeler & OTR (Off the Road) vehicles.**

### Business Challenge: Data synchronization

As different Distributors / Dealers follow different ways of entering and storing the data inside their system for all their transactions. Usually, common tools like Tally, Quick books or a customized software which serves their purpose. The key missing objective in this process is that manufacturer couldn't connect or synchronize the data. Data is vital in understanding business process and further analyzing the same and allowing to make appropriate decision making.

#### Bizgaze Solution covering with the following features

- \* Manufacturer can connect to all the Distributors using a special tool called 'Connector'
